

Dear MyHome--

I want to thank MyHome for helping me remake a room of my home once again, this time the kitchen. It seemed like a long time, but it really wasn't, just a few weeks to transform my old, inefficient kitchen into something practical and easy to maintain and, since this is Manhattan, something that works aesthetically as part of the living room. I want to commend Beth Gilbert (and Kamilah) for patiently guiding me through the design process and helping me with choices. Once the job began, Justin was always available, a vital role because having one's home dismantled is unsettling, and one often needs reassurance. Finally I want to praise Lasha for his strong work ethic, skill and determination.

I will be in touch one of these days about the next project.

Thanks,  
Debbie Finn
